Program Description (written by provider)	
<p>A+ In Home Tutoring provides highly individualized tutorial services to all students grades K-12 in reading and mathematics. Services are designed to meet the educational needs of all students including students with disabilities and English Language Learners. This method of individualizing instruction is highly effective in raising student achievement levels. For this reason A+ In Home Tutoring provides services only one-on-one, in-home as a primary teaching method. By offering this type of program, parents have the flexibility to choose the most convenient program for their family but at the same time assure that their student receives the benefits of individualized instruction. This model of instruction ensures that students respond best to tutorial session topics and content as they directly align to that student's specific needs and prevent frustration or embarrassment that that student may face in the classroom or larger group setting. Services in the A+ In Home Tutoring program take place primarily in the student's home preventing the need for transportation on behalf of the parent. While the parent/authorized adult must be present for the entire tutorial session, offering the convenience of in-home tutoring and the opportunity to set their own schedule directly with instructional tutor prevents unnecessary cancellations and allows sessions to be conducted consistently for the student. Parents also have the option of having sessions take place at a local public location such as a library or community</p>	

center as determined on a per case basis with prior authorization from the school district.

Program Description (written by provider)

Achieve HighPoints is an online math tutoring program for grades 3-12 aligned to Massachusetts state standards. We help students reach grade level proficiency and achieve higher state test scores through our online tutoring program. Our platform is available from any internet connected computer 7 days a week using a laptop provided for the duration of program use. Our platform provides students with the flexibility to learn on their own schedule. No fighting Massachusetts weather or traffic. Students work at their own pace as they complete the expected 3-4 hours of tutoring per week. We have a proven track record of success with 82.5% of students who complete program improving their math grade in school. (Source: 2009, Georgia DOE). Students who finish the 30-35 hour program and see an average 15 point increase in test scores. The success of our students is a testimony to the effectiveness of our platform.

Experience with:	Limited English Proficient (LEP) students: Yes Students with disabilities: Yes	

Program Description (written by provider)

The Action Learning Connection SES Model provides a unique approach to SES tutoring. Rather than assuming that all students require the same materials and the same educational approaches in order to overcome weaknesses and to succeed academically, ALC looks at each school's and student's needs and selects appropriate and varied materials and approaches that will ensure student achievement success. The ALC method is to identify student needs through test data, classroom teacher observation, and input from school curriculum experts, administrators, and parents. Once needs are identified, the ALC team works with the regular school education team to select quality, effective, motivational, and appropriate materials for instruction. All ALC materials are based on the National Standards and the MA Frameworks/Standards. However, a heavy emphasis is placed on preparing the child for total academic success by emphasizing learning strategies and steps for problem solving. ALC instruction takes place at the student(s)' schools and at other community sites.

<p>Program Description (written by provider)</p>
<p>ATS has almost 8 years of experience tutoring students in Reading and Math in grades K-8. Our free, computer-based tutoring program has a strong record of improving students' academic achievement on state standards and increasing their gains. We provide each student with a laptop, with which they can access the curriculum, SuccessMaker. SuccessMaker is published by the national education publisher, Pearson, and has been proven to increase academic gains. Our tutoring program includes a pre- and post-test, monthly progress reports, and a Student Learning Plan with 2 SMART goals. Students receive tutoring in their home for the convenience of their parents and families. Our tutors monitor the tutoring sessions remotely and are available by phone to help our students. We offer tutoring before school, after school on weekends, and in the summer. Students receive 2 hours of tutoring per week and 8 hours of tutoring per month.</p>

<p>Program Description (written by provider)</p>
<p>Catapult Learning has provided supplemental academic intervention and support for students for more than thirty-five years. Our small group tutoring programs and award center help students earn better grades and increase self-esteem. Our Achieve Reading™ Flex and Achieve Math™ curriculums are engaging, intensive remediation and instruction geared toward improving students' skills. Catapult Learning aims to provide K-8 students in MA with medium-group instruction with a student/teacher ratio of 6:1 to 10:1. Most students will receive instruction for at least 12 hours per month. Programs will be held at student's school, community based organization, or religious organization. Our teachers administer pre- and post-assessment, identify and address students' skill gaps, and carefully monitor individual student progress in the medium-group setting. We provide all materials and transportation is provided at select sites. Catapult Learning serves Regular Education students, Students with learning disabilities and English language Learners.</p>

Students with disabilities: Yes

Program Description (written by provider)

Club Z! delivers the individualized instruction students need to meet their academic goals in reading and mathematics. Club Z! specializes in working with all students, including those with disabilities and English language learners. Club Z! develops a customized program aligned to the Massachusetts Curriculum Frameworks for each student for advanced academic achievement. Club Z! instructors travel to each student's home so parents/guardians are not required to provide transportation to and from a learning center. Club Z! also offers small group instruction where students are tutored in groups of no more than 5 students per instructor directly after school hours. Students who complete Club Z! supplemental educational services show an average of a year's worth of growth, so start your child on the road to academic success by joining the Club Z! club today!

Program Description (written by provider)

Educate Online offers live tutoring over the Internet. Students log on to our secure website from home, while a teacher log on from another location. Computers and internet access are provided for any family who needs it. Our tutoring sessions are taught by U.S. based, state certified teachers with at least two years of successful classroom teaching experience. Students receive tutoring that has been specifically designed for each student, and each tutor is assigned only 1 to 3 students during instruction. Tutoring is available 7 days a week and parents choose their child's schedule which generally includes 2-4, 60 minute sessions per week. Educate Online programs are available in Reading or Math for students in grades 3-12. Students on average achieve 1 full grade level growth during the program.

Students with disabilities: Yes

Program Description (written by provider)

Our program addresses the needs of children in grades K-12 who are reading significantly below grade level or whose math scores are significantly below grade level. Multi-sensory reading and math instruction is delivered individually or in small groups of 5-6 students. The program is coordinated with classroom instruction and directly tailored to students' needs. The math program will focus on computation and concepts utilizing hands-on activities and projects in order to develop a strong foundation and build confidence. The writing program will focus on good sentence structure and paragraphing skills. The program utilizes published materials that have proven to be effective through scientific research and will be chosen based on the needs of the individual learners. The program will help the youngsters be successful with their day-day classroom activities.

Type of Organization: For Profit
 Experience with:
Limited English Proficient (LEP) students: Yes
Students with disabilities: Yes

Program Description (written by provider)

The Kinetic Potential Scholars (KPS) Program is an innovative tutoring and youth development program that has been addressing the comprehensive needs of at-risk youth over the past two years. Founded upon the belief that every child has remarkable potential, KPS provides a roadmap for these students, the future KP Scholars. KPS matches each and every student with academic KP Tutors as well as Guidance and Career mentors. KPS' goal for its students is three-fold:

*Improve the Quality of Education – By recruiting its KP Tutors from America's top graduate universities in education-including those of Harvard, Penn, and Yale-KPS not only selects from a pool of highly-qualified instructors, but also brings on board individuals who are specifically committed to providing at-risk students with equal educational opportunities. KP Tutors lead 1:1 sessions and groups of 8-10 students for one hour sessions anywhere from 2-4 times a week in math/language arts.

*Improve Student Motivation – Kineticville, KPS' cutting-edge virtual world, uses 3D video game technology, streaming digital video, and detailed avatar designs to drop students into a truly hands-on learning environment. In this virtual environment, students learn by doing and exploring, not simply by memorizing and reciting facts. The learning experience is designed to engage students as the most popular video games.

*Provide More Individual Attention – Students struggling educationally need more attention both academically and socially. KPS creates an individualized portfolio for every one of its KP Scholars, outlining their unique academic, social, and professional goals. KPS believes that students need to not only understand what they are learning, but also how it relates to their own lives and career plans. KPS pairs every KP Scholar with up to five Mentors to help students prepare for their long-term goals and to become life-long learners.

Program Description (written by provider)
<p>Learning Magic is a locally owned and operated provider of Supplemental Education Services in Reading and Writing to all ages and skill levels. Learning Magic specializes in providing one-on-one tutoring and small group instruction. Our program begins with a visit to your child's school to meet the principal and teacher to identify your child's needs and skills. A parental consultation, diagnostic testing, and an individualized curriculum to maximize student's performance follows the initial school personnel meeting. Our dynamic and engaging program provides live instruction with certified teachers. First, we assess each student to find strengths, weaknesses, challenges and needs. Next, we set realistic goals using current materials and teaching techniques, educational games and hands-on activities. We monitor student progress throughout the process and inform parents after every fourth session on their child's progress. Our post tests and tutoring notes validate and provide data for further remediation or enrichment. Parents are always welcome and invited to visit Learning Magic. We have Special Education teachers on staff and we take pride in our ability to work with students on IEP'S and 504 Plans. We will meet with you at your home, school or library.</p>

Program Description (written by provider)
<p>Pinnacle Learning Center is a locally owned and operated provider of supplemental educational services in Reading, Writing, and Mathematics. Pinnacle Learning Center's programs are designed to help students achieve and go beyond Massachusetts's learning standards. We teach students of all ages and skill levels how to build the skills and learn the strategies that they need to succeed in school. Pinnacle students improve their overall academic performance as a result. Our highly experienced, MA certified teachers are trained to use the most current materials and teaching techniques to help students achieve growth in the Massachusetts Curriculum Frameworks as measured by the Massachusetts Comprehensive Assessment Survey.</p>

Our individualized program offers options of instruction in private, semi-private or small groups. We use state-of-the-art resources to help each child improve. We monitor each student's progress throughout the process and schedule meetings at various intervals with parents/guardians to update their child's progress. Our pre and post-test assessments and tutorial anecdotal notes validate progress and provide data for further remediation or enrichment.

Our program includes an initial parent/guardian consultation, diagnostic testing, strong communication with classroom teachers and an individualized curriculum designed to maximize each student's performance.

Program Description (written by provider)
<p>Smarties Tutoring Services offers instruction in Language Arts, Mathematics, and Science using state-of-the-art curricula. Our classes are taught in small groups or one-on-one by experienced teachers who are enthusiastic about helping children improve their math, literacy, and science skills. Our programs make every effort to challenge and motivate students to maximize their academic potential. Smarties recognizes that each child is unique, and we strive to meet the specific needs of each of our students. We set students up for success by expecting rigorous work, while giving them the support that they need to meet our high expectations of them.</p> <p>Parental involvement is integral to our success. At Smarties, we encourage parent-teacher communication and invite parents to contact us whenever they have a question or concern. Parents are always welcome to attend our programs. After four sessions, parents receive a "Smartie Work Plan" that contains individual goals, assessment scores, and specific areas of academic focus. Each month, parents receive a written report on their child's progress. At the end of the program, parents receive a comprehensive evaluation that reviews and assesses their student's achievement based on the "Smartie Work Plan."</p>
