

CAMBRIDGE COLLEGE PREPARES
ELEMENTARY SCHOOL TEACHERS
FOR THE NEW MASSACHUSETTS
SCIENCE STANDARDS!

The School of Education at Cambridge College offers Science coursework for graduate credit that can help Plymouth Elementary School teachers understand and incorporate the New Massachusetts Science Standards.

EARN GRADUATE CREDITS FOR COURSES RELATED TO THE NEW STANDARDS

Elementary Science and Engineering Technology (ELE 653A) 3 credits

This course introduces teachers at the elementary level to the newly drafted revisions of the Massachusetts Science, Technology, and Engineering standards along with the instructional tools and strategies required to effectively advance learner achievement specific to the new performance expectations. The course includes both early childhood and elementary science practices and content designed to strengthen scientific literacy among learners as they explore and use key knowledge specific to earth, life, physical and engineering sciences. The course is offered in a hybrid format that features both online learning and interactive, face-to-face instruction. The online learning module will begin on February 26th. Class will meet on Thursdays from 4-8 p.m. beginning on March 5th through April 9th.
