Middleborough Public School Recognizes High School Math Teacher Vicki Miles for being named a semi-finalist for the Massachusetts Teacher of the Year.

Middleborough, MA - The Middleborough Public Schools would like to congratulate Vicki Miles for being named a semi-finalist for the Massachusetts Teacher of the Year. Vicki has been with the Middleborough School district for ten years and currently also serves as the department head for the math department at Middleborough High School.

Paul Branagan, Principal at MHS, said “Vicki is an inspirational teacher. Her connections with students are tremendous and her ability to bring mathematics to life in the classroom is beyond compare.” In recent years Vicki has worked in a program aimed at supporting students who have historically struggled with math. Mr. Branagan said “She takes academic risks in the classroom by trying new and innovative strategies to help make the learning of mathematics relevant, which is so important.”

Vicki has been a large part of the growth that the math department has seen over her tenure as department head at MHS. Dr. Melanie Gates, the Director of Curriculum, Instruction and Technology, spoke highly of Vicki saying “She excels with developing curriculum, meaningful instruction, high-quality assessments, and purposeful integration of technology that yields improved student outcomes.” As department head Vicki has helped to assemble an amazing group of teachers and collectively they have worked to raise student achievement.” Dr. Gates went on to say that “Vicki has, time and time again, demonstrated her commitment to working alongside her colleagues with sharing best practices, analyzing data, and refining assessments. She has really set the tone for professional collaboration and it has paid dividends with improved student achievement in math.”

Superintendent of Schools Brian E. Lynch said “I would like to thank Vicki for her dedication to our school district. Vicki has completed curriculum work throughout our district to support high quality math instruction. Most recently, she has been instrumental in the re-alignment of our grade 6 through 12 mathematics curriculum. Mrs. Miles is an extremely accomplished educator and we’re so proud and pleased that she is an integral member of our Middleborough team of educators.”

The Middleborough Public Schools would like to thank Vicki for her service to the students of our district through living and breathing our mission to foster a culture of excellence within every student (and staff member), in every classroom, every day. Thank you Vicki! We are proud of you and the work you do each and every day.
